

I am so glad to have been invited to join Project M2. The program covered knowledge about different aspects of society and the eminent guests gave wonderful sharing. They also invited us to have a discussion and share our thoughts afterwards.

Not only did the program broaden my horizons, it was also a precious opportunity to learn from those famous experts. Mr Antony Leung, Mr Howard Lee, Ms Anita Lam have all achieved a great deal as pillars of society. After listening to their sharing and exchanging ideas with the participants, I changed my perspective and have further thoughts about the financial and technology industry in Hong Kong. In addition, I came up with some new innovative ideas during our discussion.

I believe that with the passion and skills that I acquired from this program, I can also become a capable stakeholder and even a pillar that helps to build a brighter future for Hong Kong. What Mr Ivan Wong said best summarizes what I have learned. "Success= ability(0-100)* Passion(0-100)* Mindset(1 or -1), so stay positive while keep learning with passion"

Photo: I was awarded the Most Valuable Player certificate by Mr Antony, Leung Kam-chung.
